

## Type sheet

Deflagration and endurance burning proof pressure and vacuum relief valve  
**KITO® VD/MB-IIB1-..../....**

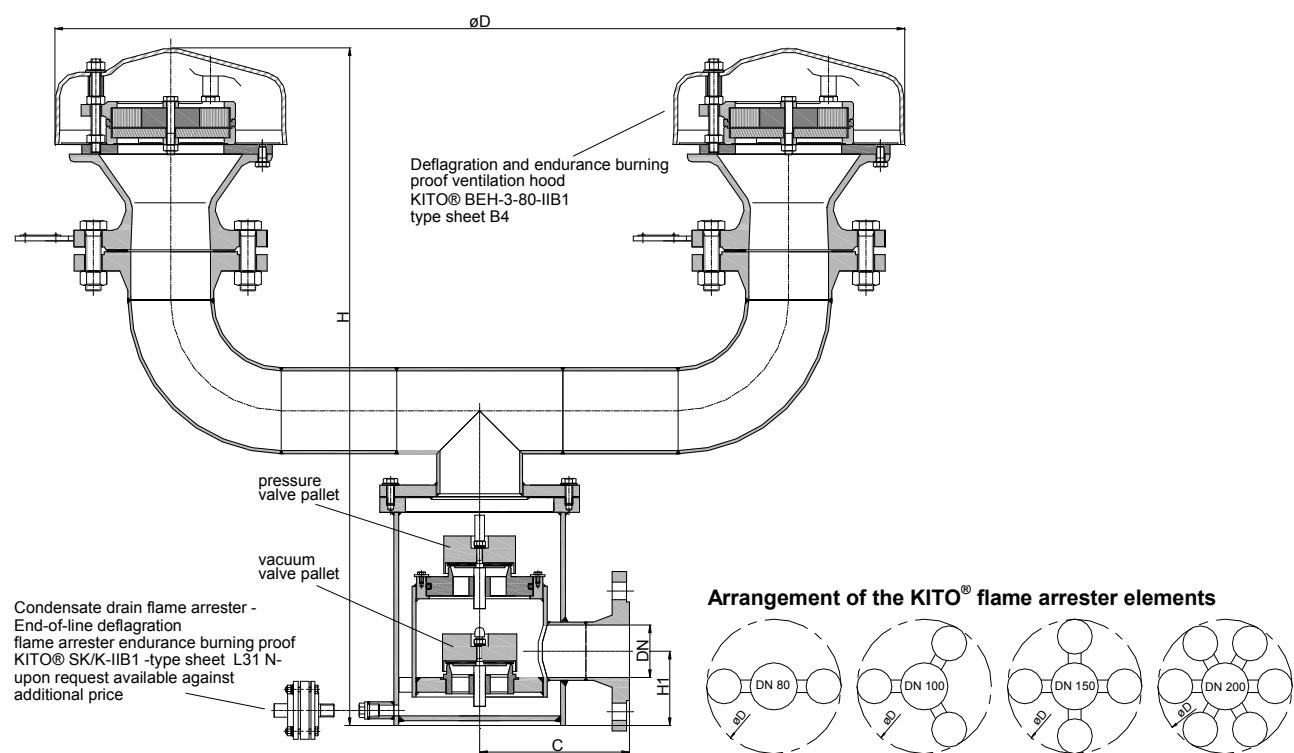

## Application

End-of-line flame arrester. Explosion and endurance burning proof for all inflammable liquids and vapors of explosion group IIB1 and also for alcohols with a maximum experimental safe gap (MESG)  $\geq 0.85$  mm and an maximum operating temperature of 60 °C. This device is not permitted to be installed in enclosed areas. Installation on top of storage tanks, tank access covers or breather pipes. Used as venting and breather device for fixed roof tanks to prevent inadmissible pressure and vacuum and to minimize gas losses by variable pressure setting. An explosion proof condensate drain is also available for this model at extra cost.

**KITO® BEH-3-80-IIB1 with additional examination and approval, applicable also for alcohols (ethanol, methanol...)**
