Description

The NIR-9 level monitor is suitable for wide applications for bulks and solids in silos and hoppers. Regardless of humidity and conductivity of the product, the maximum or minimum level is controlled reliably. Available are different vanes and process connections according to each product and tank size.

Operation

A synchronous motor drives a rotating vane that is extended into the tank by means of a shaft. As soon as the bulk reaches the rotating vane, its rotation is blocked. The restoring force moves the pivoted motor away from its original position. Hereby, a micro switch is actuated, which gives out an alarm signal. A second microswitch turns off the motor. If the filling level decreases, the rotating vane is released again and the force of a spring pulls the motor back to its original position. The motor gets turned on again and the working contact is switched back.

The switching sensitivity can be adjusted in three steps by changing the spring position.

Applications

- Cereal
- Flour
- Granulated plastics
- Cement
- Sand
- Cacao
- Sugar
- Various bulk materials

Technical Details

Measuring principle: rotating vane
 Medium temperature: -20 ... +90 °C
 -20 ... +200 °C (NIR-92)
 Ambient temperature: -20 ... +60 °C
 Pressure: -0.5 ... +0.5 bar
 Max. grain size: 50 mm
 Min. bulk density: 0.038 g/cm³ (depends on vane and sensibility) see table below
 Sensibility: adjustable in 3 steps
 Rotation speed: 5 r.p.m.

Materials

Housing: polyester coated aluminium
 360° rotatable
 Connection, cable, extension, tube, vane: stainless steel, aluminium (page 5)

Process connection (standard)

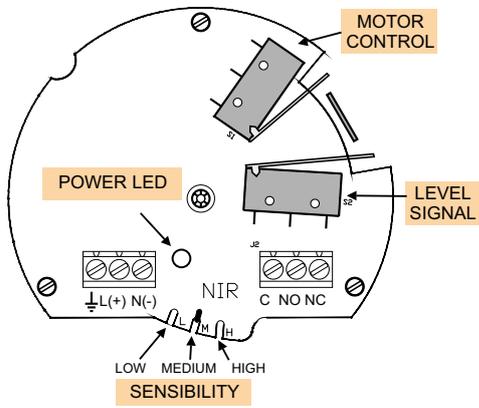

-NIR-910 / E910 G1 male stainless steel 1.4305
 -NIR-920 / E920 G1 male stainless steel 1.4305
 -NIR-962 / E962 G1 male stainless steel 1.4305
 -NIR-95F / E95F G1 male stainless steel 1.4305
 -NIR-940 / E940 G1 male aluminium
 -NIR-930 / E930 G 1½ male stainless steel 1.4305
 Other connections: thread adapters for G 1¼, G 1½, 110 mm and 200 mm flanges
 Vane types: standard N, foldable vane V, cruciform vane X, aggregate vane A, reinforced vane R
 ATEX approval: II 2/1D Ex t IIIC T85 °C Db/Da
 Power supply: 24 V_{DC}, 24 V_{AC}, 48 V_{AC}, 110 V_{AC}, 230 V_{AC}, 50/60 Hz power led
 Power consumption: max. 2 VA
 Electrical connection: 2 x M20 x 1.5
 Contact: micro switch (SPDT)
 max. 250 V_{AC}, 2 A (max. 125 VA)
 Protection: IP66

Bulk density with different types of rotating vanes*

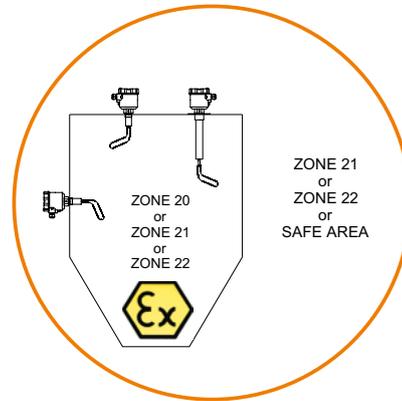

Rotating vane types	High sensibility	Medium sensibility	Low sensibility
N and R	0.14 g/cm ³	0.185 g/cm ³	0.214 g/cm ³
V	0.038 g/cm ³	0.047 g/cm ³	0.057 g/cm ³
X	0.04 g/cm ³	0.05 g/cm ³	0.06 g/cm ³
A	0.45 g/cm ³	0.55 g/cm ³	0.65 g/cm ³

NIR-93... NIR-E93... (ATEX) (reinforced)	0 = without	0 = without R = reinforced A = aggregate Y = special	G8 = G1½ F3 = flange 110 mm reinforced 1½" GF YY = special		

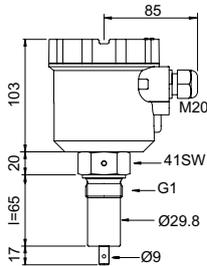

¹⁾ Only for top installation. Rigid extension without protection pipe max. 1,5 m. Please specify length »L«.
²⁾ Only for top installation. Rigid extension with protection pipe max. 4 m. Not available with mechanical connection G6 and G7. Please specify length »L«.
³⁾ Only for top installation. Flexible stainless steel cable extension max. 10 m, (max. pull force of the cable 4 kN). Please specify length »L«.
⁴⁾ Please check mechanical connection in order to ensure a perfect match between mechanical connection and vane size.
